I'm a property in Lincoln Montana and very concerned where the repository sight will be located. The property owners are not in agreement with the chosen areas and there needs to be more study done before a final sight is selected. I hope you don't make a hasty decision as it may cause irreparable harm to the already fragile Blackfoot river and its feeder streams. Please take more time and weight other options. Thank you for your help in selecting a suitable sight. I know it must be a difficult decision for everyone but you need to make the correct one. Sincerely Robert Johnson.
